EDUCATION

Beykent University

Software Engineering
2021 - (...)

Haydar Akin Technical High School

IT / Database Programmer
2017-2021

WORK EXPERIENCE

Mobile App Developer

The Food Runners / 07.2021 - Present

I work remotely and freelance in this project. I collaborate closely with project teams and maintain clear communication to ensure a deep understanding of project goals and user needs. This enables me to deliver solutions that align with the project's vision and resonate with users.

Mobile App Developer

New Software Solutions / 07.2021 - 02/2022

I developed an Android B2B application that streamlines bulk order processing for Umut Deftir's sales representatives at fairs. The app empowers sales representatives with a comprehensive product catalog, intuitive order placement, real-time order tracking, secure payment processing, and advanced reporting capabilities. Built using Flutter and leveraging Rest APIs, the application showcases my proficiency in database design and UI/UX design. The app's implementation resulted in a 30% increase in the efficiency of sales representatives at fairs, significantly boosting their productivity and streamlining the overall sales process.

CERTIFICATION

Google Developer Students Club

Flutter Fest Certificate of Achievement
2022

BTK Akademi

Version Control Systems: Git and GitHub
2022

SKILLS

- Dart & Flutter SDK
- State Management (Bloc, Provider)
- API integration
- Java
- C# & C++
- Testing (unit tests, integration tests, widget tests)
- Version control (Git)
- Cross platform software
- UX/UI design principles
- Time management
- Networking basics

LANGUAGE

English

B1 (Proficient in reading and understanding technical documentation)

Volunteer Experience

Beykent University

Software Engineering Club (2022-2023)

We led in-club coding events with more than 40 participants, providing technical consultancy and helping members improve their coding skills. Collaborated with the club's social media team to create interesting content on social media.
