Professional Summary

Mobile Application Developer with **hands-on experience** in **Flutter**, focusing on delivering functional and user-friendly applications. Successfully **built and deployed** a driver logistics platform actively used by **50+ personnel**, implementing real-time tracking and REST API integrations. Currently expanding technical skillset in **Native iOS (Swift)**. Experienced in software quality assurance; identified and reported **25+ documentation issues** within the Huawei ecosystem.

Experience

Huawei

Istanbul

DTSE (Developer Technology Support Engineer)

Long Term Intern June 2025 – August 2025

- Systematically reviewed ArkTS official documentation, identified and **reported 25+ issues** to relevant teams, and ensured their follow-up.
- Built sample applications with ArkTS for wearable devices.
- Created a demo integrating Watch 5 Smart Gesture feature into 3rd-party applications.
- Managed development workflows with Git, performed code reviews, and applied unit testing.

The Food Runners

Los Angeles, CA

Mobile Application Developer

July 2023 – Present

- Designed and developed a Flutter-based driver app for a delivery operation with 50+ drivers.
- Features: multi-driver order assignment, real-time location tracking, proof-of-delivery photo uploads, and earnings dashboards.
- Delivered end-to-end tracking with REST API integrations and notification flows.
- View Project

New Software Solutions

Istanbul

Mobile Application Developer (Volunteer Internship)

July 2021 – Feb 2022

- Built a B2B Android app for Umut Deftir to streamline bulk ordering for sales representatives (Flutter + REST API).
- Implemented catalog, order management, payment, and reporting modules, improving field efficiency by 30%.
- View Project

Education

Istanbul Beykent University

Istanbul

BSc, Software Engineering. GPA : 3.11/4.00

2021 - Graduated Summer 2025

Haydar Akın MTAL

Istanbul

Technical High School, Database Programmer

2017 - 2021

Professional Working Proficiency

Projects

Customer Churn Prediction with AI (Supported by TÜBİTAK 2209-A)

Team Lead & Researcher

- Full Project Title: Customer Churn Prediction with Artificial Intelligence: Sustainable Customer Analytics in Subscription-Based Industries.
- Developed a high-performance predictive model using **LSTM networks**, achieving a validated **93.60% accuracy** and **0.95 AUC score**.
- Engineered a custom **Batch Stacking architecture** to combine the strengths of various ML algorithms, significantly improving generalization capabilities.
- Validated model suitability for **industrial decision support systems** through rigorous testing with PCA-based feature selection methods.

PERSONAL WEBSITE

ataemirkaba.com

- Built my personal website using React.js and Tailwind CSS, deployed on AWS, to showcase portfolio and project notes.
- View Project

Technical Skills

Core: Flutter, Dart, Swift, SwiftUI.

Tools & Cloud: Git, Jira, RESTful APIs, AWS, Huawei Cloud.

Languages: Python, Java, C++, ArkTS

Leadership & Activities

Beykent University Software Engineering Club

Tech Team Lead

2022 - 2023

- Organized coding events with **50+ participants**, provided mentoring, and created technical content.
